REASONS FOR ALLOWANCE

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of records fails to disclose or render an obviousness of an apparatus comprising: a sample circuit configured to detect a state of an input signal and present during a plurality of clock cycles; and a selection circuit configured to present a filtered signal in response to a selected number of intermediated signals having a lost state and a multi-bit selection signal representing a filtering value wherein the filtered signal indicates input signal has been lost when selected number of lost states is greater than filtering value as cited in independent claims 1, 11, and 20.

The closest found prior art is Zhou (U.S. 6,389,438). Zhou discloses a match filter and signal reception apparatus comprising a sample circuit configured to detect a state of an input signal and present; and a selection circuit configured to present a filtered signal in response to a selected number of intermediated signals having a lost state and a multi-bit selection signal representing a filtering value. However, Zhou fails expressively or inherently disclose the sample circuit present the state of input signal during a plurality of clock cycles and the filtered signal indicates input signal has been lost when selected number of lost states is greater than filtering value as cited above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chat C. Do whose telephone number is (571) 272-3721. The examiner can normally be reached on 7:00AM to 5:00PM M-Th.
